

CLAIMS

I claim:

1. A geometric craft and educational kit comprising:
a punch-out sheet having cut therein a plurality of faces, each face being
5 comprised of a plurality of rhombi having two opposite ends, a first end and a
second end, said rhombic said first ends connected upon said face, said rhombic
second ends connected to adjacent rhombic second ends upon adjacent faces.
2. The geometric craft and educational kit of claim 1 wherein:
10 said faces having three rhombi.
3. The geometric craft and educational kit of claim 1 wherein:
said faces having five rhombi.
- 15 4. The geometric craft and educational kit of claim 1 wherein:
said plurality of faces being four.
5. The geometric craft and educational kit of claim 1 wherein:
said plurality of faces being eight.
- 20 6. The geometric craft and educational kit of claim 1 wherein:
said plurality of faces being twenty.

7. The geometric craft and educational kit of claim 1 wherein:
said plurality of faces being twelve.
8. The geometric craft and educational kit of claim 1 wherein:
5 said punch-out sheet is comprised of cardboard.
9. The geometric craft and educational kit of claim 1 wherein:
said punch-out sheet is comprised of plastic.
10. The geometric craft and educational kit of claim 1 wherein:
said punch-out sheet is comprised of paper.
11. A geometric craft and educational kit comprising:
a punch-out sheet having cut therein a plurality of faces, each face having
15 a triangular outline, said triangular outline having vertices, each face being
comprised of three rhombi having two opposite ends, a first end and a second end,
said rhombic said first ends connected upon said face, said rhombic second ends
connected to adjacent rhombic second ends at said vertices upon adjacent faces.
12. The geometric craft and educational kit of claim 11 wherein:
20 said plurality of faces being four.

13. The geometric craft and educational kit of claim 11 wherein:
said plurality of faces being eight.
14. The geometric craft and educational kit of claim 11 wherein:
5 said plurality of faces being twenty.
15. A geometric craft and educational kit comprising:
a punch-out sheet having cut therein a plurality of faces, each face having
a pentagonal outline, said pentagonal outline having a vertices, each face being
10 comprised of five rhombi having two opposite ends, a first end and a second end,
said rhombic said first ends connected upon said face, said rhombic second ends
connected to adjacent rhombic second ends at said vertices upon adjacent faces.
16. The geometric craft and educational kit of claim 15 wherein:
15 said plurality of faces being twelve.
